

Extend Hi-Res audio from your TV using the CAT100EARC

HDMI audio return and CEC control in one neat solution.

Get the most out of your smart TV apps by taking the Hi-Res Dolby or DTS audio from the TV and distributing the signal to a remote AVR.

Users can also then control the AVR from the remote zone via the CEC pass-through. The CAT100EARC extender transmits HDMI eARC or optical audio signals up to a distance of 100m.

Extend Hi-res audio formats from the following streaming platforms:

Example: Deliver Hi-Res audio via HDMI eARC from the smart TV to a remote AVR
